A Sponsorship Opportunity:

Why Should YOU Get Involved?

Domestic Violence is a continuing problem for many families in South King County. We refer to it by many names such as spousal abuse, family violence, intimate partner violence but the ultimate aim of all forms of domestic violence is the same. It is a pattern of behaviors used by one person in a relationship to coercively control the other. Power and control can be maintained using physical, sexual and emotional violence. On average, more than three women are murdered by an intimate partner in this country each day. Children who experience domestic violence often develop problems with anger management, self esteem, trauma reactions and withdrawal.

Goals for this Event:

To raise awareness about domestic violence.

To raise resources to support prevention efforts and services for victims of domestic violence in our community.
